Executive Summary

Modular, scalable AI radiology platform for chest X-ray interpretation and CT thorax analysis—optimized for high-throughput screening, field-level deployments, and rapid triage.

Platform Scope

X-Ray + CT: Unified suite for DecXpert Auto X-Ray & DecXpert CT Thorax.

Workflow: Designed for high-throughput screening and structured reporting.

Clinical Performance

~98% Accuracy: Proven performance in clinical settings (per proposal).

Screening Focus: Optimized to minimize false negatives for public health safety.

Operational Fit

Integration: PACS / Mini-PACS ready; seamless DR machine workflow.

Deployment: Offline-capable for field programs; optional cloud sync.

Compliance & Security

Regulatory: ISO 13485/14971 aligned; CDSCO Class 2B; MDR compliant.

Security: RBAC, MFA, and encrypted communication.

Preferential Pricing

3-Year Licenses (Excl. Tax)

DecXpert X-Ray Suite

₹1,25,000

✓ 3-Year License

Includes 20,000 Scans

DecXpert CT Platform

₹3,00,000

✓ 3-Year License

Includes 6,000 Scans (Introductory Pricing)

Note: Pricing includes software deployment, PACS integration, and standard support. Scan limits apply as specified.

DecXpert SX

AI-powered computer-aided detection (CAD) for automated interpretation of chest and skeletal X-rays—optimized for high-throughput screening and offline, on-premise deployments.

High-Speed Analysis

Instant respiratory abnormality detection & structured reports in seconds.

Offline- Ready

Field capable for mobile DR units; no internet required for core inference.

Batch Robustness

Handles mixed batches seamlessly; intelligent file segregation.

 Baseline Spec

Minimum 4 GB RAM

Simple 3-Step Setup

Chest Interpretation

- ✓ Detects clinically significantly 40+ chest abnormalities with high sensitivity.
- ✓ Generates heatmaps visually indicating AI's area of focus for diagnostic clarity.
- ✓ Acts as a triage engine and structured second reader to prioritize cases.

Skeletal Analysis Coverage

- ✓ Analyzes multiple skeletal regions to support broader radiography workflows.
- ✓ Seamless integration with existing radiology workflows for orthopedic screening.

Integration & Reporting

- ✓ **PACS/Mini-PACS Ready:** Compatible with standard DICOM viewers and archives.
- ✓ **Editable Reports:** Radiologists can add expert comments and vet findings.
- ✓ **Voice-to-Text:** Audio transcription supported for rapid reporting notes.

Screening Workflow Visualization

Ingest Image

AI Analysis

Structured Report

Expert Review

DecXpert CT Platform

Deep learning system for volumetric chest CT analysis using 3D CNNs—optimized for large-scale screening and clinical triage.

3D Convolutional Neural Networks
Volumetric analysis for comprehensive respiratory abnormality detection.

Normalization Pipeline

Standardizes inputs before inference to improve robustness across diverse scanners and protocols.

✓ Why Normalization Matters for Screening

- 

Reduced Variability

Handles intensity, contrast, and reconstruction differences.
- 

Consistent Inference

Improves model stability across different devices.

- 

Cross-Vendor Ready

Deploy confidently in multi-vendor environments.
- 

Triage Reliability

More dependable outputs for high-throughput queues.

Comprehensive Feature Set

Detailed feature coverage for DecXpert Auto across core AI analysis, data handling, and reporting workflows.

Core AI Analysis

High-Speed Analysis

Instant respiratory abnormality detection and structured reports generated in seconds.

Included

Heatmap Precision

Visually indicates the AI's area of focus on the X-ray for diagnostic clarity and verification.

Included

Data Handling

Multi-Format Support

Seamlessly handles DICOM (.dcm), JPG, JPEG, and PNG formats in mixed batches.

Included

Intelligent Segregation

Routes successful and failed files to separate folders with logs to prevent raw data loss.

Included

Reporting & Vetting

Editable Reports

Allows radiologists and experts to insert additional comments alongside AI findings.

Included

Audio Transcription

Voice-to-text input to add radiology comments directly into reports for faster turnaround.

Included

Comprehensive Feature Set

Continued coverage of DecXpert Auto features focusing on deployment readiness, enterprise-grade security, and ongoing technical support.

Deployment Integration

Seamless Integration

Works with PACS/Mini-PACS; compatible with existing workflows; cloud sync ready.

Included

Simple 3-Step Setup

Activate license → Configure folder → Start processing.
Baseline req: 4GB RAM.

Included

Enterprise & Security

Secure Storage

CDSO and ISO compliant data management and retention practices.

Included

Admin Dashboard

Secure admin access to edit/view patient reports and manage workflow settings.

Included

Data Analytics

Real-time analytics dashboard for trend identification and reporting.

Included

Flexible Hosting

Supports on-premise local processing or optional cloud-based inference.

Included

Customer Support

Integration Assist

Automated workflow management support during initial integration.

Included

Tech Maintenance

Ongoing updates and troubleshooting with 4-hour response SLA.

Included

Deployment Ready

All features designed for high-throughput operational environments.

Clinical Validation & Performance

Evidence-backed performance supported by large-scale datasets, multi-center annotations, and peer-reviewed validation.

~98%

Overall Accuracy

In clinical settings (per proposal)

Peer-Reviewed Evidence

Multicentre study published in Nature Scientific Reports (2024) demonstrating robustness across diverse populations.

Dataset Strength

10 Lakh+

Training Cohort

Multi-center sourcing

~3 Lakh

Testing Cohort

Expert annotated

5 Lakh

Validation

Independent studies

Screening Safety

Optimized to minimize false negatives (FN). High Negative Predictive Value (NPV) ensures safe triage in public health screening programs.

Sensitivity

High

Specificity

High

Generalizability

Multi-Vendor

Regulatory Clearances & Data Privacy

Quality management systems, regulatory alignment, and enterprise security controls to support safe deployment in clinical environments.

Quality & Regulatory Compliance

ISO 13485 & 14971

Aligned with global standards for Medical Device Quality Management & Risk Management.

CDSCO Class 2B

Marketing license secured (MD 5); fully compliant with Indian Medical Device Rules.

Global Alignment

Designed per EU MDR 2017/745 principles; FDA pathway currently in progress.

Peer Validation

Clinical performance validated in multi-center studies (Nature Scientific Reports).

Data Privacy & Security Controls

HIPAA Aligned

GDPR Principles

DPDP Ready

Encryption

End-to-end encrypted communication (TLS/SSL) for data in transit and rest.

RBAC

Role-Based Access Control to ensure data is only visible to authorized personnel.

MFA Support

Multi-Factor Authentication adds an extra layer of login security.

Deployment Options

On-Premise

- Local hospital server installation
- Complete data residency control
- Offline capabilities for field use

Secure Cloud

- SaaS infrastructure model
- Automatic updates & scaling
- Centralized remote access

Clinical Impact & Deployments

Real-world outcomes and active deployments demonstrating measurable workflow improvements and screening scale-up.

Measured Outcomes

50,000+

Patients Prioritized
For immediate care escalation

+40.1%

Case Yield
More cases identified vs. baseline

10×

Faster Turnaround
Reduction in diagnostic TAT

+52.8%

Treatment Efficacy
Improvement in monitoring (CT)

About Dectrocel

Pioneering Radiology AI

Dectrocel is a medical technology company building Software-as-a-Medical-Device (SaMD) solutions. Our platforms are developed in close collaboration with clinicians to solve real-world screening challenges.

Incubated At

SGPGI, Lucknow

MedTech Center of Excellence

SaMD Focused

Certified medical device software designed for clinical diagnostics.

Workflow First

Integrated solutions that fit existing hospital and field operations.

Research Driven

Algorithms developed with direct input from academic researchers.

Strategic Clinical Mentorship

Dr. Randeep Guleria

Former Director

AIIMS, New Delhi

Dr. Alok Nath

Head of Pulmonology

**SGPGI,
Lucknow**

Dr. Archana Gupta

Head of Radiology

**SGPGI,
Lucknow**

Technical & Research Team

Dr. Saumya Shukla

PhD, Public Health (Sanjay Gandhi Postgraduate Institute of Medical Sciences) Lucknow
MBA - NUS business school
Data science - Harvard medical school

Dr. Ankit Shukla

PhD - AI in Medicine from Queensland Medical School UQ, Brisbane, MS , Duke-NUS Medical School Singapore, Alumnus Denmark Technical University, Copenhagen & Basel University, Switzerland

Mr. Nikhil Mishra

Researcher in AI and Machine Learning as applied to Medicine from IIT Kanpur

Pricing & Contact

It Includes comprehensive license terms, deployment support, and defined scan volumes.

DecXpert X-Ray Suite

₹1,25,000

3-Year License (Ex-Tax)

20,000 Scans Included

- ✓ Chest & Skeletal AI CAD
- ✓ Offline-ready deployment
- ✓ PACS/Mini-PACS integration

DecXpert CT Platform

₹3,00,000

3-Year License (Ex-Tax)

**Includes 6,000 Scans
(Introductory Pricing)**

- ✓ 3D Volumetric Analysis
- ✓ Normalization Pipeline
- ✓ Advanced Triage Reporting

What's Included in the License

- ✓ Software installation & setup
- ✓ Workflow configuration & mapping
- ✓ Tech support (Remote/On-site)
- ✓ Technical walkthrough & training
